Subject: Leitrim County Development Plan

To whom it may concern,

There is a growing body of evidence that the mining of gold is an energy intensive and carbon heavy process that has the potential to negatively impact on a wide range of areas including water quality, landscape, agriculture, tourism and biodiversity amongst others. The carbon heavy, energy intensive nature of the industry is also not compatible with the sustainable future that we are trying to create for this and following generations. The possible development of such an extractive industry would be incompatible with our obligations to urgently tackle climate change and the worst impacts of the climate emergency. This matter has become all the more urgent with the granting of prospecting licenses for 47 townlands in the county. The Leitrim County Development plan should reflect the unanimous will of Leitrim County Councillors who have registered their opposition to gold mining. And listen to the will of the local Leitrim residents such as myself.

I find it ironic that given the position Eamonn Ryan is taking regarding his proposal to bog turf that he has granted this prospecting license given the grave environmental concern it poses.

Keep Leitrim as lovely Leitrim!

Please do your civic duty in protecting Leitrim's environment

Regards
Mairead Kelly Seibert
